

DATA SHEET

Polycom® RealPresence® CloudAXIS™ Suite

Secure, enterprise-grade video collaboration with anyone using a web browser

Until now, secure, enterprise-grade video collaboration has been available only within the company firewall. Now, with the Polycom® RealPresence® CloudAXIS™ Suite, you can enjoy the same high-quality video collaboration with anyone outside your company.

The Polycom® RealPresence® CloudAXIS™ Suite is a first-of-its-kind video collaboration software solution that enables businesses to collaborate with other businesses—or individuals—easily and securely, independent of application, system, or device. It is a pure software extension of the Polycom® RealPresence® Platform for private and public cloud deployments enabling universal access to enterprise-grade video collaboration to any business (B2B) or consumer (B2C) at the highest quality, interoperability, reliability, and security.

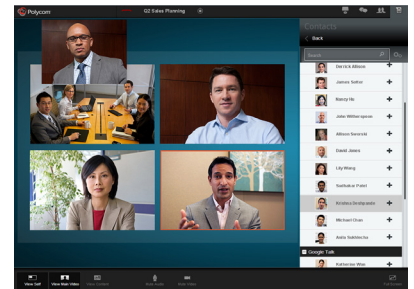

Video collaboration that's simple to use

With a browser and web camera on a PC, smartphone, or a tablet, RealPresence CloudAXIS Suite extends web video collaboration to anyone. It includes the industry's first presence-aware global directory that integrates contacts from popular social applications such as Skype®, Google Talk™ and Facebook® enabling you to invite them via IM into a secure impromptu video collaboration meeting that is Polycom powered. For scheduled meetings, RealPresence CloudAXIS Suite lets you easily arrange future meetings and automatically sends email and calendar invitations with the meeting details, including a web link for simple click-to-connect convenience. Comprehensive host control features include high resolution content sharing that can also be initiated by anyone in the meeting, along with group chat, and session recording. For people on the go, you can invite Polycom® RealPresence® Mobile users, making it easy to extend video collaborative experiences with mobile users anytime and anywhere.

Universal access available to everyone

Bringing people together and collaborating over video is made easy with RealPresence CloudAXIS Suite—confidently, and with the same enterprise-grade, secure meeting experience that all Polycom mobile, desktop, room and immersive theater system solutions provide.

The RealPresence CloudAXIS Suite is delivered as a software solution to be installed on a customer-provided industry standard server, and leverages core capabilities of the enterprise-grade video infrastructure provided by the Polycom® RealPresence® Platform, the industry's most interoperable, scalable, and secure UC platform.

Benefits

- Access to billions of B2B and B2C users regardless of device, protocol, or service
- Invite anyone, anywhere to join your video call via a browser with consistent high quality and security
- Single presence-aware global directory supporting Skype, Google Talk and Facebook contacts
- Host or join a video conference using a wide range of Polycom mobile, desktop, room and immersive theater systems
- Collaborate over video with anyone with a web browser and web cam—confidently, with the same enterprise-grade, secure meeting experience that all Polycom solutions provide
