

Williams AV Interpreter Infrared

Sistem IR menawarkan audio jernih dengan cahaya inframerah, ideal untuk ruang kecil hingga besar. Cocok bagi yang membutuhkan bantuan pendengaran atau penerjemahan, sistem ini memastikan pesan tersampaikan jelas dan aman dalam satu ruangan.

- Solusi transmisi audio untuk berbagai ukuran ruang
- Transmisi audio yang aman dalam satu ruangan
- Jangkauan hingga 2.787 m² (30.000 ft²)
- Mendukung hingga 4 channel dalam satu ruangan
- Desain ringkas dan tidak mencolok

Keunggulan Infrared

- Jangkauan emitter lebih luas.
- Anti sadap.
- Fleksibel untuk berbagai kebutuhan.
- Mudah Dipasang.

Cocok untuk digunakan di

- Pemerintahan
- Rumah Ibadah
- Pendidikan
- Teater

	Induction Loop	Analog RF	Infrared	Digital RF	Wi-Fi	AI Captioning
Hearing aid compatibility	Yes, without receiver needed.	Yes, through receiver with neck-loop.	Yes, through receiver with neck-loop.	Yes, through receiver with neck-loop.	Yes, via Bluetooth/streamer.	N/A
Cost	Relatively high (installation costs)	Low	Low	Low	Low	Relatively high
Complexity of installation	High	Low	Low-Medium	Low	Medium	Medium
Flexibility of installation	Low (usually best on floor).	High (long range, no line of sight required).	Low, emitter must be in room (line of sight required)	Medium (medium range)	Medium (medium range of WAPs)	Low
Confidentiality can be ensured	Not ideal, some overspill risk.	No	Yes, signal maintained within walls.	Yes, through 4-digit pin code.	Yes, through PIN code and password protection of SSID.	No
Portable solution	No (for medium-large area loops).	Yes	Yes	Yes	Possible with carry case	No
Smart phone compatible, latest technology	No	No	No	No	Yes	Cutting-Edge Technology
Add to existing space	Medium	Easy	Relatively easy (some concerns about appearance)	Easy	Easy (utilize existing Wi-Fi)	Relatively Easy
Utilize for Hearing Assistance AND Interpretation	No	Yes	Yes	Yes	Yes	Possible with Convey Video
Support for the profoundly Deaf	No	No	No	No	No	Yes
